221

Galaxies
A study of the neutral hydrogen near the interacting galaxies NGC 4631 and NGC 4656, *A. J. B. Winter* ... 1
227 Millimetre emission from extragalactic objects—I. Observational techniques and data analysis, *M. Rowan-Robinson, P. E. Clegg and P. A. R. Ade* ... 603
133 Infrared photometry of NGC 1068 at 25 and 33 μ, *Theodore Simon and H. M. Dyck* ... 19P
567 The scale of galaxy clustering and the mean matter density of the Universe, *S. Michael Fall* 23P
501 The ultraviolet fluxes from some nearby galaxies, *D. J. Carnochan, C. Navach and R. Wilson* 27P
49P On the age of the Draco dwarf galaxy, *Vittorio Castellani* ... 59P
433
455

General relativity
97 Gravitational redshifts and angular diameters of collapsed objects, *P. K. Das* ... 623
181

Infrared astronomy
117 The infrared spectrum and structure of eta Carinae, *David K. Aitken and Barbara Jones* ... 141
433 Infrared photometry in the R CrA association, *I. S. Glass and M. V. Penston* ... 227
41P Infrared light curves of Algol, *M. J. Smyth, M. J. Dow and W. McD. Napier* ... 235
Infrared sources in obscured regions, *D. A. Allen and M. V. Penston* ... 245
493 The infrared excess of cool giant stars: a chromospheric contribution, *David L. Lambert and*
175 *Ronald L. Snell* ... 277
40–350 micron emission from NGC 2023, *J. P. Emerson, I. Furniss and R. E. Jennings* ... 411
9P Infrared photometry of NGC 1068 at 25 and 33 μ, *Theodore Simon and H. M. Dyck* ... 19P
175

Instruments and techniques
257 The effects on the performance of a spectrograph camera caused by using non-parallel
535 incident light, *C. F. W. Harmer* ... 325
A dual narrow-band wavelength scanning polarimeter, *D. Clarke and I. S. McLean* ... 545
Millimetre emission from extragalactic objects—I. Observational techniques and data analysis, *M. Rowan-Robinson, P. E. Clegg and P. A. R. Ade* ... 603
1
221

Interstellar medium
441 Line-leaking models for interstellar molecular emission and absorption—II. Masers in the methyl alcohol spectrum, *Margaret Pelling* ... 41
Giant grains in Orion, *M. Rowan-Robinson* ... 109
The structure of the Bok globule B361, *Edward G. Schmidt* ... 401
High velocity gas in the direction of δ Sco, *T. R. Hicks, N. K. Reay, J. Ring and R. J. Scadden* 53P

Magellanic clouds
Photometry of LMC X-ray candidates, *P. R. Warren and J. E. Penfold* ... 41P
UBV photometry of the LMC cluster NGC 1466, *A. J. Penny* ... 65P

Nebulae—gaseous
Numerical calculation of thin shell formation in supernova remnants, *S. A. E. G. Falle* ... 55
13 Anomalous scattering in the Crab Nebula, *A. G. Lyne and D. J. Thorne* ... 97

PAGE

Giant grains in Orion, *M. Rowan-Robinson* 109
The infrared spectrum and structure of eta Carinae, *David K. Aitken and Barbara Jones* ... 141
On fragmentation in a collapsing gas cloud, *Robert Connon Smith and Alan E. Wright* ... 221
The structure of the Bok globule B361, *Edward G. Schmidt* 401
40–350 micron emission from NGC 2023, *J. P. Emerson, I. Furniss and R. E. Jennings* ... 411
Large scale line splitting associated with the dense neutral intrusions and ionization fronts in the core of M8, *K. H. Elliott and J. Meaburn* 427
Observations of 6 GHz absorption lines from the $^2\pi_{3/2}$, $J = 5/2$ state of OH, *F. F. Gardner and J. B. Whiteoak* 9P
Nickel and copper in the Orion nebula, *A. D. Thackeray* 49P
High velocity gas in the direction of δ Sco, *T. R. Hicks, N. K. Reay, J. Ring and R. J. Scadden* 53P

Nebulae—planetary
The ultraviolet spectrum of planetary nebula IC 2149, *G. A. Gurzadyan* 249
The far-ultraviolet spectrum of NGC 6543, *A. Boksenberg, D. Carnochan, J. Cahn and S. P. Wyatt* 395
On the kinematics and orientations of planetary nebulae, *Kyle Cudworth* 57P

Occultations
Multicolour photometry of an occultation of Europa by Io, *Paul Murdin* 385

Photometry—non-stellar
The infrared spectrum and structure of eta Carinae, *David K. Aitken and Barbara Jones* ... 141
Multicolour photometry of an occultation of Europa by Io, *Paul Murdin* 385
Infrared photometry of NGC 1068 at 25 and 33 μ, *Theodore Simon and H. M. Dyck* ... 19P

Physical processes
Numerical calculation of thin shell formation in supernova remnants, *S. A. E. G. Falle* ... 55
Anomalous scattering in the Crab Nebula, *A. G. Lyne and D. J. Thorne* 97
An explanation of anomalous velocities in pulsar scintillation patterns, *B. J. Uscinski* ... 117
On fragmentation in a collapsing gas cloud, *Robert Connon Smith and Alan E. Wright* ... 221
Stellar stability in close binary systems, *J. C. B. Papaloizou and G. T. Bath* 339
Alfvén waves and Meyer's sunspot model, *P. R. Wilson* 535
Cosmic ray streaming—I. Effect of Alfvén waves on particles, *J. Skilling* 557
Polarization characteristics of synchrotron emission in a plasma, *J. T. Stocke and J. S. Scott* 567
On the bubble method of stability analysis, *Robert Connon Smith and Klaus J. Fricke* ... 577
Tidal capture formation of binary systems and X-ray sources in globular clusters, *A. C. Fabian, J. E. Pringle and M. J. Rees* 15P
On the kinematics and orientations of planetary nebulae, *Kyle Cudworth* 57P

Planets
Asymmetries of Jupiter's magnetosphere, *M. M. Komesaroff and P. M. McCulloch* 91
The effects of tidal forces on the stability and dispersal rates of a protoplanet, *J. R. Donnison and I. P. Williams* 257
Multicolour photometry of an occultation of Europa by Io, *Paul Murdin* 385

Pulsars
An explanation of anomalous velocities in pulsar scintillation patterns, *B. J. Uscinski* ... 117

Quasars
The optical jet in the quasar 3C 273, *B. N. G. Guthrie and W. McD. Napier* 85
New spectrometric results on the quasar 3C 273, *A. Boksenberg, K. Shortridge, R. A. E. Fosbury, M. V. Penston and A. Savage* 289

Radio astronomy
A study of the neutral hydrogen near the interacting galaxies NGC 4631 and NGC 4656, *A. J. B. Winter* 1
Line-leaking models for interstellar molecular emission and absorption—II. Masers in the methyl alcohol spectrum, *Margaret Pelling* 41
Anomalous scattering in the Crab Nebula, *A. G. Lyne and D. J. Thorne* 97
3C 219: a double radio source with a jet, *Brian D. Turland* 181
A line-leaking model for silicon monoxide millimetre wavelength emission, *Margaret Pelling* 421
Angular size–flux density relation for extragalactic radio sources, *G. Swarup* 501
Cosmology from angular size counts of extragalactic radio sources, *Vijay K. Kapahi* 513

Millimetre emission from extragalactic objects—I. Observational techniques and data analysis, *M. Rowan-Robinson, P. E. Clegg and P. A. R. Ade* 603
Observations of 6 GHz absorption lines from the $^2\pi_{3/2}$, $J = 5/2$ state of OH, *F. F. Gardner and J. B. Whiteoak* 9P

Spectroscopy
Line-leaking models for interstellar molecular emission and absorption—II. Masers in the methyl alcohol spectrum, *Margaret Pelling* 41
The continuous absorption coefficient of atomic and molecular negative ions, *T. L. John* ... 305
The effects on the performance of a spectrograph camera caused by using non-parallel incident light, *C. F. W. Harmer* 325
Dielectronic satellite spectra for highly-charged helium-like ions—II. Improved calculations, *C. P. Bhalla, A. H. Gabriel and L. P. Presnyakov* 359
A line-leaking model for silicon monoxide millimetre wavelength emission, *Margaret Pelling* 421

Stars
Optical observations of stars near southern galactic X-ray sources, *M. V. Penston, Margaret J. Penston, Paul Murdin and W. L. Martin* 313

Stars—atmospheres of
High velocity gas in the direction of δ Sco, *T. R. Hicks, N. K. Reay, J. Ring and R. J. Scadden* 53P

Stars—binary
On light curve analysis of X-ray binaries, *D. T. Wickramasinghe and J. Whelan* 175
Infrared light curves of Algol, *M. J. Smyth, M. J. Dow and W. McD. Napier*... 235
Stellar stability in close binary systems, *J. C. B. Papaloizou and G. T. Bath* 339
An extended observation of Cen X-3 with the *Ariel*-5 sky survey, *K. A. Pounds, B. A. Cooke, M. J. Ricketts, M. J. Turner and M. Elvis* 473
Parameters of Cen X-3 deduced from observations of its accretion wake, *J. C. Jackson* ... 483
Ariel 1118−61: a very close binary system?, *J. E. Pringle and R. F. Webbink*... 493
Ariel V sky survey: observations of the accretion wake in Vel X-1, *G. Eadie, A. Peacock, K. A. Pounds, M. Watson, J. C. Jackson and R. Hunt*... ... ... 35P
Differential *uvby* photometry of the spectroscopic binary HD 217061, *Howard H. Lanning and Warren A. James* 1P
Tidal capture formation of binary systems and X-ray sources in globular clusters, *A. C. Fabian, J. E. Pringle and M. J. Rees* 15P
Identification of He^3 in the binary system 68u Herculis, *R. W. Hilditch and P. W. Hill* ... 29P

Stars—chemical composition of
Metal abundances in nearby stars and the chemical history of the solar neighbourhood, *B. E. J. Pagel and B. E. Patchett* 13
A new photometric metal abundance and luminosity calibration for field G and K giants, *P. A. Jennens and H. L. Helfer* 667
Photometric metal abundances for 20 clusters, *P. A. Jennens and H. L. Helfer* 681
Metal abundances for G and K giants and subgiants at the South Galactic Pole, *P. A. Jennens* 695
Metal abundances for K giants in a field in Scutum, *H. L. Helfer and P. A. Jennens* ... 701
Identification of He^3 in the binary system 68u Herculis, *R. W. Hilditch and P. W. Hill* ... 29P
On the age of the Draco dwarf galaxy, *Vittorio Castellani* 59P

Stars—clusters of
The luminosities of the beta Canis Majoris variables, the zero age main sequence and the distance of the Sco–Cen association, *L. A. Balona and M. W. Feast* 191
Physical properties of the red giants in NGC 2420, *Wayne Osborn* 631
Photometric metal abundances for 20 clusters, *P. A. Jennens and H. L. Helfer* 681
Hβ photometry in M39, *D. Kilkenny, C. E. J. Hilditch, R. W. Hilditch, P. W. Hill and A. E. Lynas-Gray* 5P
Tidal capture formation of binary systems and X-ray sources in globular clusters, *A. C. Fabian, J. E. Pringle and M. J. Rees* 15P
UBV photometry of the LMC cluster NGC 1466, *A. J. Penny* 65P

Stars—magnetic fields in
A non-axisymmetric rigid rotator model for magnetic stars, *M. J. Stift* 133

PAGE

Stars—photometry of
Infrared photometry in the R CrA association, *I. S. Glass and M. V. Penston* 227
The infrared excess of cool giant stars: a chromospheric contribution, *David L. Lambert and Ronald L. Snell* 277
Optical photometry of stars near Cen X-3, *Margaret J. Penston and Paul Murdin* 377
A new photometric metal abundance and luminosity calibration for field G and K giants, *P. A. Jennens and H. L. Helfer* 667
Photometric metal abundances for 20 clusters, *P. A. Jennens and H. L. Helfer* 681
Differential *uvby* photometry of the spectroscopic binary HD 217061, *Howard H. Lanning and Warren A. James* 1P
Hβ photometry in M39, *D. Kilkenny, C. E. J. Hilditch, R. W. Hilditch, P. W. Hill and A. E. Lynas-Gray* 5P
Photometry of LMC X-ray candidates, *P. R. Warren and J. E. Penfold* 41P
UBV photometry of the LMC cluster NGC 1466, *A. J. Penny* 65P

Stars—spectroscopy of
Observations of chromospheric and coronal emission lines in F stars, *R. G. Evans, Carole Jordan and R. Wilson* 585
Ultraviolet chromospheric lines in the spectra of late-type stars, *G. A. Gurzadyan* 617
A spectrographic study of beta Centauri, *N. R. Lomb* 639

Stars—structure and evolution of
On the structure and stability of a polytrope with an isothermal core, *Shin Yabushita* ... 441
On the bubble method of stability analysis, *Robert Connon Smith and Klaus J. Fricke* ... 577

Stars—variable
The luminosities of the beta Canis Majoris variables, the zero age main sequence and the distance of the Sco–Cen association, *L. A. Balona and M. W. Feast* 191
The RR Lyrae variable HD 268892, *P. J. Andrews* 271
Observations of rapid blue variables—XVI. VZ Sculptoris, *Brian Warner and A. D. Thackeray* 433
The slope of the surface brightness–colour relation for Cepheids, *R. J. Thompson* 455

Stars—velocities of
Radial velocities of southern early-type stars at intermediate galactic latitudes, *D. Kilkenny and P. W. Hill* 649

Sun
Quiet and active solar emission of Fe XV 284 Å radiation, *C. W. Allen*... 159
An investigation of material motions in a sunspot, *Susan A. Lamb* 205
Alfvén waves and Meyer's sunspot model, *P. R. Wilson*... 535

Ultraviolet astronomy
Quiet and active solar emission of Fe XV 284 Å radiation, *C. W. Allen*... 159
The ultraviolet spectrum of planetary nebula IC 2149, *G. A. Gurzadyan* 249
The far-ultraviolet spectrum of NGC 6543, *A. Boksenberg, D. Carnochan, J. Cahn and S. P. Wyatt* 395
Ultraviolet chromospheric lines in the spectra of late-type stars, *G. A. Gurzadyan* 617
The ultraviolet fluxes from some nearby galaxies, *D. J. Carnochan, C. Navach and R. Wilson* 27P

X-ray astronomy
X-ray source counts and the X-ray background from Uhuru, *A. C. Fabian* 149
On light curve analysis of X-ray binaries, *D. T. Wickramasinghe and J. Whelan* 175
Optical observations of stars near southern galactic X-ray sources, *M. V. Penston, Margaret J. Penston, Paul Murdin and W. L. Martin* 313
Optical photometry of stars near Cen X-3, *Margaret J. Penston and Paul Murdin* 377
An extended observation of Cen X-3 with the *Ariel*-5 sky survey, *K. A. Pounds, B. A. Cooke, M. J. Ricketts, M. J. Turner and M. Elvis* 473
Parameters of Cen X-3 deduced from observations of its accretion wake, *J. C. Jackson* ... 483
Ariel 1118−61: a very close binary system?, *J. E. Pringle and R. F. Webbink* 493
Tidal capture formation of binary systems and X-ray sources in globular clusters, *A. C. Fabian, J. E. Pringle and M. J. Rees* 15P
Ariel V sky survey: observations of the accretion wake in Vel X-1, *G. Eadie, A. Peacock, K. A. Pounds, M. Watson, J. C. Jackson and R. Hunt*... ... ... 35P
Photometry of LMC X-ray candidates, *P. R. Warren and J. E. Penfold* 41P
